## OFFICE DEPOT, INC.

## RECONCILIATIONS OF NON-GAAP FINANCIAL MEASURES

We report our results of operations using measures of financial performance prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). We also disclose other non-GAAP financial measures that we use to assess our returns and capital structure. These measures are used to assist management in making business decisions to maximize stockholders' value and certain of these measures are included as metrics determining variable pay arrangements.

Non-GAAP results are presented where that presentation will afford management and investors an opportunity to make meaningful comparisons to results in prior periods. The presentation of such non-GAAP information is not intended to suggest that such information is superior to the presentation of GAAP information, but only to clarify some information and assist the reader. We have included reconciliations of this information to the most comparable GAAP measures in the tables included within this material.

## OFFICE DEPOT, INC. <br> RECONCILIATION OF NON-GAAP FINANCIAL MEASURES <br> FREE CASH FLOW <br> (Dollars in millions)

We define free cash flow as net cash provided by (used in) operating activities less capital expenditures. We believe that reporting free cash flow is useful to management and investors because it relates operating cash flow to the capital that is spent to continue and improve our existing businesses. Further, free cash flow facilitates management's ability to strengthen our balance sheet, repay our debt obligations and consider investment alternatives. Free cash flow is not a measure of financial performance under generally accepted accounting principles in the U.S. and may not be defined and calculated by other companies in the same manner. Free cash flow does not represent the residual cash flow available for discretionary expenditures as it does not incorporate certain cash payments, including payments made on capital lease obligations, scheduled debt repayments or other firm commitments and payments. Free cash flow should not be considered in isolation or as an alternative to cash flow provided by operating activities as an indicator of performance.

* As adjusted amounts are non-GAAP financial measures. These measures are presented to provide management and other users an opportunity to make meaningful assessments and comparisons of results from total operations (GAAP) and results after isolating Charges/Credits that are not indicative our core operations (non-GAAP). Such Charges/Credits may include but not be limited to charges and credits related to merger integration, restructuring, Staples acquisition, signficant asset impairments, and the related tax impacts of such items. These adjustments may be used for variable pay considerations. The presentation of non-GAAP information is not intended to suggest that such information is superior to the presentation of GAAP information, but only to provide information and assist the reader.
** The Company recognizes deferred tax impacts in its US tax provision for determining non-GAAP net income and EPS. The change results from having accumulated non-GAAP earnings in that jurisdiction for a 36 month period and the projection of future non-GAAP earnings. This change has not been applied to the tax provision for determining GAAP net income or EPS as the Company remains in a cumulative loss for the 36 month period on a GAAP basis.

Note: Amounts may not foot due to rounding.
